

Branching policies

- Repository

stable, can be used by others at their own peril

- main

- Other branches

stable, used for (internal) development

- development

- feature/gradient_descent

branch

merge

- bugfix/memory_leak

- ...

unstable, potentially buggy

- Tags, e.g., releases

- 1.0

- 1.1

stable, used for production

feature/bugfix branches are short-lived
